

Lightnight Lesson

HOW I USE CLAUDE SKILLS & COWORK FOR LINKEDIN (LIVE DEMO)

Powered by Maven | Hosts: Pietro Montaldo

QUICK EXPECTATION SETTING FOR THIS WORKSHOP

- FAST & DENSE SESSION (45 MIN TOTAL)
 - What are skills? What is CoWork?
 - 5 examples
- IT WILL BE RECORDED AND SENT TO ALL OF YOU
- SCREENSHOT WHAT YOU WANT
- YOU HAVE A LOT IN COMMON - KEEP THE CHAT GOING (Q&A)
- I WILL STAY ON FOR AN ADDITIONAL 15, FOR EXTRA Q&A

CLAUDE ECOSYSTEM (MARCH '26)

HOW YOU USE CLAUDE

Claude Chat

Web & mobile interface
Conversation-based
Best for: Q&A, writing, analysis
claude.ai / iOS / Android

Claude Cework

Desktop app (macOS)
Autonomous file & browser work
Best for: documents, research, automation
Superpower: Autonomous Worker
Desktop only — no Projects integration

Claude Code

Terminal / IDE (agentic coding)
Reads codebase, writes & tests
Best for: developers & engineers
Terminal / VS Code / JetBrains

WHAT EXTENDS CLAUDE

Projects

Workspace on claude.ai
Holds files & instructions
Gives Claude the WHAT
(context/memory on your work)

Skills

Reusable instruction sets
Expert craft knowledge
Gives Claude the HOW
(expertise in a task type)

Connectors

Bridges to other apps
Slack, Asana, Linear...
Read & act in services
(connect your tools)

Plugins

Installable bundles
Skills + commands + MCP
One-click install
(packages of tools)

SETTINGS & CONTROL

Capabilities

Feature toggles / Settings menu

/ Commands

Type / to see all quick actions

Memory

Learns your preferences
Persists across sessions

THE FOUNDATION

MCP (Model Context Protocol)

The universal connector standard — like USB-C for AI

YOUR TOOLS & SERVICES

Slack

Asana

Linear

Notion

Stripe

GitHub

A visual guide for non-technical users

CLAUDE
COWORK
(MARCH '26)

Claude Chat vs. Cowork
A side-by-side comparison — March 2026

WHAT IT IS

Claude Chat

Your always-on thinking partner

Web, mobile, any device — conversation-based

claude.ai / iOS / Android

Claude Cowork

Your autonomous desktop worker

Delegates tasks, controls your computer & files

Desktop app

BEST FOR

Think, write, and explore ideas

Analyze docs and create artifacts

Quick Q&A from any device, anytime

Brainstorm, draft, and learn interactively

Produce polished files and documents

Automate multi-step workflows end-to-end

Browse, extract and process data autonomously

Delegate tasks and walk away

CAPABILITIES

Feature	Chat	Cowork
Create real files (.docx, .pptx...)	Yes	Yes
Access local files	No	Yes
Control computer & browser	No	Yes
Use Skills	Yes	Yes
Use Projects	Yes	Yes
Use Connectors	Yes	Yes
Schedule automation	No	Yes
Work autonomously	No	Yes
Memory	Yes (native)	Yes (via Projects only)

They are not mutually exclusive — many users rely on both for different tasks.

CLAUDE SKILLS

What is a Skill?

A reusable instruction set that teaches Claude how to do a task well

Inside a Skill

Best Practices

Processes

Formatting Rules

Quality Standards

How Skills Are Stored

Cloud Skills

Stored in: Settings
Available in: Claude Chat
Syncs across devices
Always on for your account

Local Skills

Stored in: Working folder
Available in: Cowork & Code
File-based (SKILL.md)
Portable & shareable

Skill Examples

PowerPoint

Layouts, fonts, hierarchy

Word Docs

Headings, TOC, margins

LinkedIn

Engagement formulas and knowledge

Excel

Formulas, charts, data

The Difference

Generic output

→ add Skill →

Professional quality

Travels with you across every conversation
Activates automatically when relevant

COMPONENTS OF SKILLS

Anatomy of a Skill

What's inside a skill folder

your-skill-name/

SKILL.md

Required

The brain: your header + instructions

references/

Optional

Extra docs, style guides, examples

assets/

Optional

Templates, fonts, images, icons

scripts/

Optional

Code that Claude can run

Minimum viable skill: just a folder with SKILL.md

CLAUDE SKILLS VS PROJECTS

	Skills	Projects
What they provide	The HOW (expertise in a task) + no memory	The WHAT + Memory (context about your work)
Analogy	Professional training	A client briefing folder
Contains	Best practices, formatting rules, processes	Files, documents, instructions, conversations
Scope	Available across all your work	Specific to one topic or client
Where they live	Settings, Cowork folder, Code, API	claude.ai (web chat and now cowork)
Example	How to build a polished pitch deck	Everything about our Q2 product launch

When to Use Each

Use Both Together

Context + Expertise = Best Output

HOW I USE COWORK AND SKILLS ON LINKEDIN

- ➔ • Simple Skill: Crafting Hooks for posts
- ➔ • CoWork (browsing + local save): LinkedIn Profile Coaching / Audit
- ➔ • Skill + Cowork (browsing): Researching + crafting post and visuals
- ➔ • Skill + CoWork (browsing + scheduling): Weekly Auditing Performance
 - Checking DMs for important messages (Risky)
 - Researching a profile or helping you respond to DMs
 - Downloading DMs/Post strategy and coach you based on it
 - Crafting Other Repetitive Posts format (E.g. Lead Magnets)
- ➔ • Skill + MCP: Creating Visuals (using Excalidraw or Canva)

AI AGENT / SPECIALISED TOOL ARE BETTER

- Monitoring Trends
- Extracting Data
- Filtering post engagement
- Automating post engagement
- Trigger Workflows based on something that happens in LinkedIn

#5 METHODS TO CREATE GOOD SKILLS

BEGINNER

ADVANCED

1. Chat with Claude

Describe what you want, iterate, save as skill

2. Walk Through Docs

Do the task with Claude, iterate, extract the skill

3. Migrate GPTs/Gems

Convert existing GPTs into Claude Skills format

4. Design SKILL.md

Write the markdown file directly, maximum control

5. Adapt Pre-built

Download community skills, customize to fit

Every method produces a SKILL.md file. Start simple, grow as needed.

LIVE COURSES

Start: May 1st

AI Growth Systems
Bootcamp: Automate
Your GTM

Pietro Montaldo
AI Educator with 20K students

Cohort-based Course

 Maven

200\$ off (till end of week)

Start: April 15th

Claude for Non-
Technical Operators

Casual to Advanced
